

The HEJ DS6 is the very best choice you can make when it comes to carting smaller loads of grain, grass, manure, chicken litter, veld rubbish, animal feed and almost any other load you can think of. Equipped with single acting multistage 4" hydraulic cylinders, these trailers can tilt their bins to 52 degrees with ease. In addition, the heavy duty solid beam axles are fitted standard with hydraulic brakes as well as a full on road lights and reflector package.

OPTIONAL undercarriage choices include elliptical sprung suspensions and full bearing walking beams.

RMS offers you a choice of tyres to match your specific needs, a choice of colours to matching your existing fleet and a choice of design modifications to match the job on hand.
