BV 3500	510	960	900	95	1280

Available in mounted or trailed versions and with a variety of discs sizes from 22" to 28"

BIG VALLEY

DISC HARROW

The future of high speed field tillage is here !

Save time, save labour, save money!

With the BIG VALLEY Compact Disc, each disc is mounted on an independent sealed 168mm German SKF Bearing hub and attached to individual legs for a smooth and even operation. The hubs are maintenance free and can be changed infield in less than 10 minutes. Flexible leg mounts reduce chassis stress and reduce disc cracking from obstacle strikes significantly. The compact disc architecture cancels out rocking and helps the operator produces a smooth even tilth. The rear roller is designed to efficiently break up clods and close up open ground to minimise moisture loss.
