

CENTRE PIVOT TRACK CLOSER

SPECIFICATIONS:

Max Operating Mass:	1150 kg
Width :	2200 mm
Disc Size:	560 x 4 mm
Compaction Drum Width:	610 mm
Overall Height:	1250 mm
Overall Length:	2500 mm

MAINFRAME CONSTRUCTION:

Boxed 180 mm Channel and 12 mm MSP

HYDRAULICS:

Single 4" x 152 mm Stroke double acting Hydraulic cylinder.

FINISH:

2K Yellow

HITCH:

3 Point Category II

The TracMaster

OVERVIEW & CAPABILITIES:

The HEJ TRACMASTER is a highly efficient Centre Pivot Rut closing implement and uses its own compaction drum for depth control to virtually eliminate a closed track that has too much or too little dirt.

Even deep wet tracks pose no problem with a TRACMASTER. The track is closed to an even, level and compacted layer which is controlled by the Tractor operator from the comfort of the tractor cab. Level packed tracks are no problem with the enclosed drum that can be filled to weight 750 kg.

The TRACMASTER can be efficiently operated behind a 4WD Tow tractor of at least 55kW.

FEATURES:

- Each Disc is independently adjustable up and down
- Category II three point linkage compatible
- 76 cm x 60 cm fully enclosed compaction drum (Optional)
- Mud scraper for compaction drum
- Rugged 18 cm x 13 cm x 7.6 cm channel frame
- Six disc blade array—3 per side
- Vee formation funnels soil toward the track
- 6 mm Disc blades
